

Summer Internship Training Plan –2024 (Virtual Community Support)

Day 1: Introduction to PostgreSQL

- Learn basics of SQL, set up PostgreSQL database, and Database Schema CI platform.
- Hands-on: Able to create, insert, Update, Delete and sub-query data in PostgreSQL.

Day 2: Introduction to Angular

- Explore Angular overview, build a basic application, and integrate basic Angular functionalities.
- **Hands-on:** Create a simple Angular application with forms and components.

Day 3: Introduction to .NET

- Introduction to .NET and web API. Understand Swagger.
- Understand N-tier Repository pattern folder structure and Entity Framework (EF).
- Understanding of LINQ.
- Understanding of Code First Approach.
- Hands-on: Familiarize with .NET project structure and EF.
- Build a login API and understand how to write LINQ queries with Code First Approach.

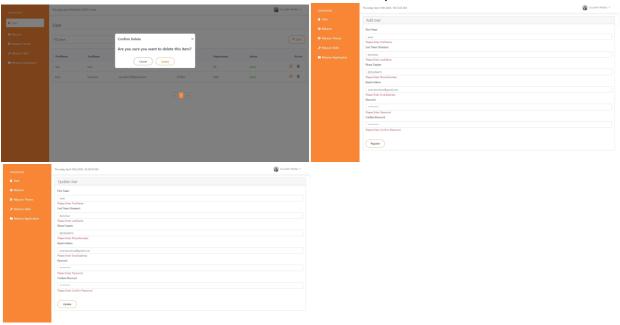

Day 4: Understand Authentication and Authorization :Role based Authorization (Admin and User roles)

• Explore authentication and authorization concepts and implementation in the project.

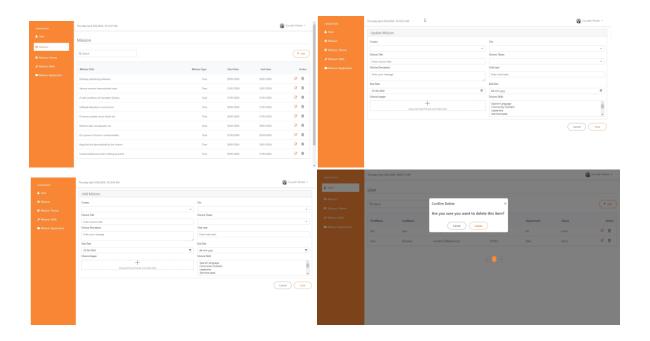

- Hands on authentication concepts, Role-Based Access Control, and Access Control Lists (ACLs).
- Hands-on: Understand and implement project authorization (Virtual Community Support).
- Login Page. Learned and implemented role-based access control.

Day 5: User Retrieval and User CRUD

- Data retrieval using joins in the LINQ Query, Sorting, filtering and paging
- Begin CRUD operations on the mission table (Retrieve and Insert).
- Continue CRUD operations on mission records (Update and Delete).
- Hands-on: Data retrieval, data filtration, insertion, update, and deletion.

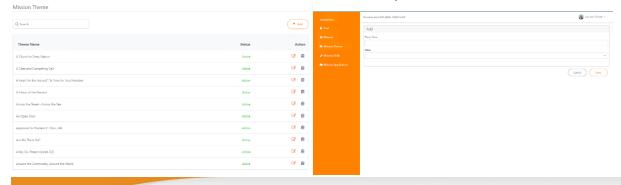

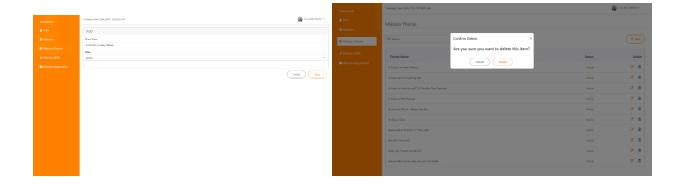

Day 6: Mission CRUD and Theme CRUD

- Begin CRUD operations on the mission theme table (Retrieve and Insert).
- Continue CRUD operations on mission theme records (Update and Delete).
- Hands-on: Data retrieval, data filtration, insertion, update, and deletion

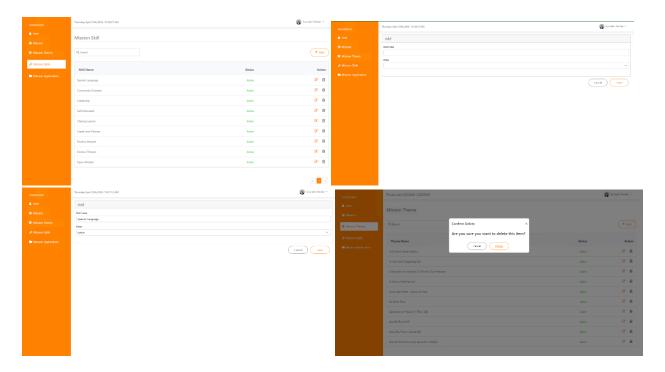

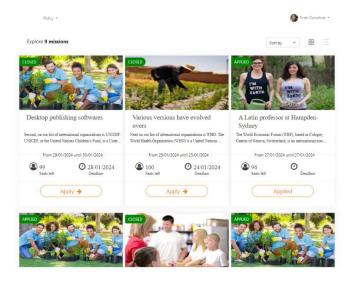

Day 7: Mission Skill CRUD and Mission Listing User Side

- Begin CRUD operations on the mission Skill table (Retrieve and Insert).
- Continued CRUD operations on mission Skill records (Update and Delete).
- Retrieve and display mission records from the table.
- Hands-on: Data retrieval, data filtration, insertion, update, and deletion
- To display mission data on the user side.

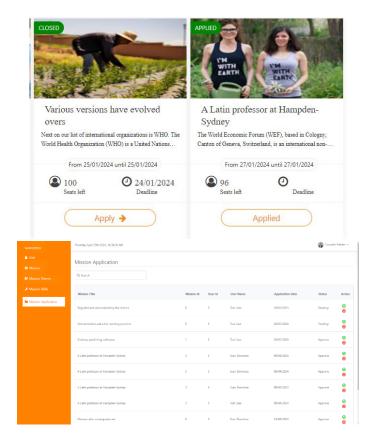

Day 8: Mission Apply, Mission Application CRUD (Apply mission List through user)

- Develop an API to facilitate mission applications.
- Complete CRUD operations on mission application records.
- · Create search API for mission applications.
- Hands-on: Implement a few functionalities to apply for missions.
 Retrieval of applied missions, data filtration, insertion, and deletion.

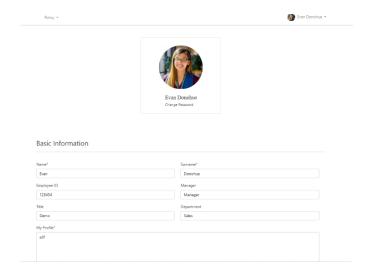

Day 9: My Profile Page and Deployment

- My Profile Page
- Explore configuring deployment environments and strategies.
- **Hands-on:** Create My Profile Page and Prepare for project deployment using various strategies.

Day 10: AWS Session

- AWS services and deployment
- Hands-on: Expand knowledge to include AWS services and deployment.
